

Recommended vaccinations - 12 days Family Adventure Trip

All vaccinations can be obtained on arrival at The Surgery, however the vaccinations recommend but not compulsory before you set off for your trip are Hepatitis A, and rabies vaccinations. Hepatitis B, Typhoid and Yellow fever are not necessary but if you want them, they can be obtained on arrival at The Surgery. Cholera vaccination is not needed but if you want it you can also get it.

For the Malaria Prophylaxis, we suggest that people obtain it on arrival in Uganda as it is cheaper.
